About Us.

Mahraj Industries is a UAE-based company specializing in high-quality tents, tensile shade structures, metal and aluminum works, and prefabricated modular solutions. We serve diverse sectors with reliable, innovative, and cost-effective products.

Our tent range includes everything from warehouse and labour tents to aircraft hangars and refugee shelters. We design and install a wide variety of tensile and car parking shades, including sail-type, swimming pool, and commercial shading systems.

We also offer complete metal and aluminum fabrication, covering partitions, staircases, platforms, fencing, steel signboards, and more. Our civil works and infrastructure services, along with modular cabins and containers, make us a one-stop solution for construction, industrial, and public sector needs.

Driven by quality and innovation, we deliver tailored solutions that meet the highest standards across the UAE and the region.
